## Energy & Climate Change

Baker & Daniels is focused on the unique legal issues associated with clean energy and climate change. We are devoted to assisting our clients with the wide-ranging flow of legal and policy initiatives affecting all areas of business. Services include:

- Interdisciplinary practice of energy, clean technology and climate change professionals
- Expertise in analyzing business risk and opportunities related to clean energy and proposed climate change laws
- Real-time policy and regulatory analysis through our consulting arm in Washington, D.C., B&D Consulting
- Experience with energy providers, venture capital, logistics companies, green building regulations and carbon offsets
- National and international perspective with offices in Indiana, Chicago, Washington, D.C. and Beijing
